| ● Spanish (Advanced) | |

Career History

GLOBANT, São Paulo, Brazil

Dec. 2024 – Present

Developer

- Supported CAP Platform, a comprehensive workflow management solution, serving clients across multiple industries.
- Automated 100+ customer workflows on the CAP Platform using Azure Logic Apps and custom C# & PowerShell Azure Entra ID connectors, reducing manual processing time by 60% and cutting error rates by 45%.
- Enforced business-rule validation in every process flow, improving data integrity and compliance across 10+ enterprise clients.
- Maintained a 97% customer satisfaction (CSAT) score by delivering rapid incident resolution, thorough root-cause analysis, and proactive performance tuning.

ITERIS, São Paulo, Brazil

Aug 2024 – Dec. 2024

Developer

- Developer at R&D PromptBot, an AI-prompt management platform that streamlines the creation and reuse of prompts for generative AI workflows.
- Ensured reliable AI outputs by standardizing prompt templates and validation rules.
- Developed Java services with Spring Boot, Gradle, and PostgreSQL to manage templates and inject user data.

- Hardened application security with Spring Security and Azure Entra ID RBAC, eliminating unauthorized-access incidents.
- Partnered with front-end developers to refine the React interface, making prompt setup more intuitive.
